SUMMARY

Data Engineer and AI Engineer with hands-on experience building cloud-based data pipelines and working with financial datasets. Skilled in Python, SQL, AWS, Databricks, and Snowflake, with experience supporting ETL workflows and reporting pipelines. Also worked on LLM-based document understanding systems and AI-driven applications. Interested in building scalable data platforms and solving real-world problems using data.

PROFESSIONAL EXPERIENCE

Data Engineer | DataEngite

04/2025

- Worked on ETL pipelines for financial and banking datasets using Python and SQL.
- Built automated data ingestion workflows using AWS services like Lambda, S3, and EC2.
- Used Snowflake to manage large structured datasets and support reporting requirements.
- Improved performance of SQL queries used in reporting and reconciliation processes.
- Supported automation of financial reporting workflows by building reusable data scripts.
- Worked with Databricks for processing datasets and organizing them into structured layers for downstream analytics.

Data & AI Associate Engineer | Smart Tech LLC

03/2024 – 12/2024

- Developed healthcare applications using Python and machine learning models.
- Built models for medical image analysis and disease prediction.
- Implemented LLM-based systems for answering medical-related queries.
- Used Databricks (PySpark) for data processing and preparing datasets for machine learning workflows.
- Developed frontend interfaces using React and JavaScript.

PROJECTS

Financial Document Intelligence System

Technology: *python, Langchain, chromaDB*

- Developed a system to extract useful insights from financial documents using language models.
- Built pipelines to process documents and enable semantic search across datasets.
- Implemented a retrieval-based approach to answer user queries from financial reports.
- Integrated structured data sources with the document processing pipeline.

Cloud Data Pipeline Automation

Technology: *Python, AWS (Lambda, S3, EC2), Snowflake, SQL*

- Built an end-to-end pipeline to collect and process structured datasets using AWS services.
- Loaded processed data into Snowflake for reporting and analytics use cases.
- Automated multiple steps in the data workflow to reduce manual processing effort.
- Optimized SQL transformations used in reporting datasets.
- Worked on organizing processed datasets so they could be used easily for downstream analysis.

SmartMed – Medical Test Booking & Report Management Platform 📁

Technology: *React, Node.js, Express, Python, MySQL*

- Built a full-stack healthcare system allowing users to book diagnostic tests and access uploaded medical reports online.
- Developed APIs to manage patient data, appointment scheduling, and report access.
- Created dashboards for users to track test bookings and securely download reports.

SKILLS

Programming Languages:

Python, SQL, JavaScript

Databases & Data Platforms:

PostgreSQL, Snowflake, Databricks (PySpark), ChromaDB, Pinecone

Cloud & DevOps:

AWS (Lambda, S3, EC2, Bedrock), Microsoft Azure (Azure OpenAI), Docker, Git, GitHub

AI / Machine Learning & Frameworks

Machine Learning, Deep Learning, Generative AI, LLM Applications, LangChain, OpenAI API, HuggingFace Transformers, PyTorch, TensorFlow, FastAPI, Flask, Streamlit

CERTIFICATES

Databricks Certified Generative
AI Engineer Associate 
by Databricks

Azure AI Engineer Associate 
By Microsoft

Zscaler Zero Trust Associate
(ZTCA) Certification 
By Zscaler Academy

EDUCATION

University of Mumbai B.E CGPA:9.03	2021 – 2024
---------------------------------------	-------------

University of Mumbai HONOURS in Articial Intlgence and Machine Learning	2022 – 2024
--	-------------
